

## Attention Deficit Hyperactivity Disorder (ADHD) A practical guide for primary school teachers CD ROM

Schools, and particularly classroom teachers, play a vital role in supporting children with ADHD, but should not be expected to do this on their own.

This professional development resource aims to provide materials to enhance the knowledge, skills and attitudes of teachers when dealing with children with ADHD, their families and health professionals.

The CD ROM has been designed for primary school teachers, however the material may also be relevant for secondary school teachers.

The materials on the CD ROM are divided into seven sections, allowing flexibility for the user:

- Section 1: Understanding ADHD
- Section 2: The challenge of school
- Section 3: The physical environment
- Section 4: Teaching and learning strategies
- Section 5: Managing behaviours
- Section 6: Identification and treatment
- Section 7: Communicating with others

Each section provides practical information and strategies for application in the classroom, while asking the teacher to take time to reflect on their current situation.

The CD ROM costs \$22 (includes GST) per copy.

For more information on this resource please go to <http://www.rch.org.au/ccch/resources.cfm> and follow the link to "Professional Development Materials" or fill in the order form below to order copies.
