

Preparation for ultrasound procedures

Educational Play Therapy offers play preparation sessions for families attending an ultrasound appointment.

This services helps families learn more about the ultrasound procedure, and gives you the opportunity to share information about your child. You'll discover ideas that can help your child feel more comfortable with the procedure and the environment in which it takes place.

If you wish your child to have an ultrasound play preparation session, we recommend it takes place:

- up to 5 days prior to the procedure for 2 to 5-year-old children.
- 7 to 10 days prior for children 6 years and older.

Play preparation sessions are offered at various times from Monday to Friday. The sessions last between 20 minutes to an hour, depending on your child's requirements. All children, including those with additional needs, can benefit from play preparation sessions and further sessions are available if required.

Session booking

If you and your child are interested in this valuable service, please contact Educational Play Therapy on **(03) 9345 5424** to make an appointment.
