Practical Paediatrics Program Part 4 2009

“The overweight child & associated disorders”

Approved for 6 RACGP Cat 2 CPD points

A practical update and tips on how to achieve weight loss in General Practice. Developed for GPs, with GPs. Active participation is encouraged and plenty of case-based studies.

Royal Children’s Hospital – Vernon Collins Lecture Theatre
Thursday evening, 8th October 6.30pm – 9.30pm (Registrations from 6pm)
Light supper provided - Easy parking available on Gatehouse Street or at RCH

Learning areas:

- When to think of medical causes and how to spot conditions like Hypothyroidism and Cushing’s.
- When to consider screening for complications including type 2 diabetes, fatty liver, PCOS and sleep apnoea.
- What screenings tests are appropriate, how to do (ie doing an OGTT well), what to do when tests are abnormal.
- How to tackle the problem and keep the child, and their family, on-side.
- Weight and non-related goals / outcomes, the long-term outlook – what works, what doesn’t.
- The crucial, and family-centred, role that a GP can play.
- When to call it quits and refer on.

Speakers:

Dr Matt Sabin

- Fellow, Endocrinology & Diabetes, The Royal Children's Hospital
- Postdoctoral Researcher, Centre for Hormone Research, Murdoch Children’s Research Institute
- Lecturer, Department of Paediatrics, The University of Melbourne
- Adjunct Senior Lecturer, Department of Physiology, Monash University

Dr Zoë McCallum, Paediatrician

- Gastroenterology and Clinical Nutrition, RCH
- Weight Management Service, RCH and Melton Health
- Senior Lecturer, The University of Melbourne
