

This package has been specifically designed for registered nurses and midwives working within a Level 2 hospital who may be required to provide care for a ventilated neonate whilst awaiting transfer to a higher level of care.

The goal of the Neonatal Ventilation package is to provide information and guidelines so that, under the direction of a Paediatrician, the Registered Nurse can demonstrate knowledge, understanding and mastery in ventilation management and associated neonatal care. Such care may be indicated whilst the neonate is awaiting transfer to a tertiary hospital via NETS.

A certificate will be awarded by NETS Education upon successful completion of the package.
