

# GIRLS

Note these charts are an approximation of the centiles from data from the fourth task force on blood pressure control in children. See *Pediatrics* 2004 Vol 114 page 555 for more accurate data

Note that BP also depends on height. The lines here are for children on the 50th centile for height.  
<http://www.cdc.gov/growthcharts/>

Up to 5mmHg should be subtracted or added for those on the 5th and 95th centiles respectively.  
 The article has the full data table.

**Centiles**  
 50th (green) 90th (orange) 95th (red) 99th (black)
