here

**Drug details**

A blood sample is taken pre-infusion and sample time recorded (see below). The infusion is commenced and delivered over 2 hours, infused dose details are recorded. Then the times for the +2, +4 and +6 hrs post start-of-infusion sample collection are calculated and recorded as 'Time Sample Due'. Collect samples and record exact time of each collection. **BLOOD SAMPLES SHOULD BE TAKEN FROM OPPOSITE ARM FROM THAT USED FOR THE INFUSION LINE TO AVOID CONTAMINATION OF BLOOD SAMPLE WITH DRUG!**

 Drug MYCOPHENOLATE MOFETIL (or CellCept) infused dose (mg) 

 Exact date and time of infusion start (dd/mm/yy hr:min) 

 Is this patient also taking Cyclosporin? Yes ☐ No ☐ If so, dose (mg) 
**Collection Details**

Sample No	Sample	Time Sample Due	Actual Time sample taken	Comments
1	0 hr (pre inf'n)			
2	2 hr (end inf'n)			
3	4 hr			
4	6 hr
