About the Centre for Community Child Health

The Centre for Community Child Health is a department of The Royal Children's Hospital and a research group of Murdoch Children's Research Institute. For over two decades the Centre has been at the forefront of early childhood research and policy.

The Centre contributes to improving the health and wellbeing of children by identifying, synthesising and translating the best evidence to inform policy, service delivery, practice and parenting.

Our Policy Brief series aims to stimulate informed debate about issues that affect children's health, development and wellbeing. Each issue draws on current research and evidence-informed practice.
