Insulin Pump Start Checklist

Before commencing on an insulin pump, there is important information to understand and go through.

An insulin pump can provide an opportunity to improve glucose control. Current insulin pumps can alter insulin delivery in response to glucose information provided by the continuous glucose monitor (CGM) and if needed, can provide an opportunity to improve your glucose levels. Many people also like the increased flexibility in their daytime routine (times and amounts of meals and snacks). Committing to learning what you need to do to manage your insulin pump helps you get the most out of this technology.

Before commencing on an insulin pump, It is important to know what appointments are involved with insulin pump education and be committed to the follow-up that is needed.

Please note, you cannot start on an insulin pump if the following steps are not completed:

- 1. This checklist **can only be** processed if your endocrinologist has submitted an insulin pump referral for you in diabetes clinic.
- 2. Go to The Royal Children's Hospital (RCH) insulin pump webpage and review the information available. https://www.rch.org.au/diabetes/Diabetes-technology/Insulin_pumps/.
- 3. Please complete this self-assessment checklist and press submit.

Before you start this checklist, ensure you have the following documents saved to attach these documents in this form:

1. Insulin pump module

https://www.rch.org.au/diabetes/learning-materials/Pump information session/

To print a paper copy of this form, go to

3. Funding applications:

For applications for funding from Breakthrough T1D or another organisation, please attach the documentation you have in this form.

Once you have completed these steps you will then be placed on the RCH insulin pump wait-list and a diabetes nurse educator (DNE) will be in contact with you to arrange completion of the needed insulin pump order forms and provide you with a number of insulin pump start appointments.

For additional information on how to complete this checklist please see our

mahaita https://www.reh.ara.au/diahata/Diahata tachnalagu/Ctarting.an.an.inculia.numn.at.DCU/

we If yo	nderstand we are responsible for arranging our own funding for the insulin pump and II fund our pump. have not organised funding or need help with your options, please be in touch with abetes team before submitting this form via diabetes@rch.org.au . *	
\bigcirc	Ising Private Health Insurance and we have completed any waiting periods. Attach this documentation in juestion 14.	
\bigcirc	Ising private health insurance and we have a waiting period. Indicate below in question 13 when the wait period end.	ing
\bigcirc	Ising private health insurance, with a waiting however, will use a 'Loan to Own' Program to access the pur prior to this date. (Ensure you check your private health insurance allows you to access this program).	mp
\bigcirc	We have applied to Breakthrough T1D (previously called JDRF) for funding, and they have confirmed we a ligible. Attach confirmation of your eligibility in question 14. Please note through this program the my (pso insulin pump is provided.	
\bigcirc	Ve have applied to another organisation for funding, and they have confirmed we are eligible. Attach onfirmation in the allocated spot below in question 12.	
\bigcirc	Ve are paying for the pump ourselves. Cost ~\$8000 - \$9000.	
\bigcirc	We have not yet organised our funding yet. Can the diabetes team please be in contact with us for help whis?	ith
	are using another organisation to fund your insulin pump, which organisation have pplied to?	
the	are completing a waiting period through the private health insurance company, insert ate for your when waiting period finishes (please add this date regardless of whether re accessing the Loan to Own program or not) (month/day/year).	
		

15.	Attach any needed documentation here i.e. Breakthrough T1D Insulin Pump Program application, or other organisation you have applied to:
	↑ Upload file
	File number limit: 1 Single file size limit: 10MB Allowed file types: Word, Excel, PPT, PDF, Image, Video, Audio
16.	We understand both the advantages and potential challanges of insulin pump therapy as covered in the the pump information module. If you do not understand, contact the diabetes team to seek further clarification: diabetes@rch.org.au *
	Yes
	Other .
17.	We have spoken to the early learning center/kinder/school who are willing to learn and support the insulin pump. \star
	○ Yes
	○ No
	Other Other
18.	We have access to a computer/laptop with internet connection and agree to look at the reports that the insulin pump can provide.
	Note: some insulin pumps can upload automatically through their connection to the mobile phone but for others when you are not using the mobile phone it means you need to plug the insulin pump into the computer to complete the upload. These uploads need to be reviewed by yourself regularly (weekly) in between your RCH diabetes appointments and will be reviewed at your diabetes appointments. If you do not have internet or computer access at home, please consider other places, such as school or library where you may be able to upload the insulin pump.
	If your insulin pump requires a manual upload this must be done prior to your appointment with the endocrinologist in diabetes clinic or when seeing the DNE. *
	○ I understand
	Other

19.	 We are choosing a Tandem T:slim X2, Medtronic or mylife YpsoPump and would like to attend an appointment for a trial line insertion before proceeding to a pump start. 	
	 Please select yes if you anticipate that your child will have any challenges with inserting the cannula under the skin. This is important to address and review before proceeding with changing from insulin injections to the insulin pump. If choosing yes, you will be contacted by the diabetes team with a date for this appointment. 	
	To trial an Omnipod, you need to arrange this with the company directly.
