Recognising and Responding to the Deteriorating Child

This one-day interactive workshop explores the roles of the experienced nurse, doctor or allied health professional in recognising and responding to a deteriorating paediatric patient.

WORKSHOP AIM
To identify and discuss the key indicators of deterioration for infants, children and adolescents.
To consider appropriate responses and interventions within your scope of practice for the paediatric patient population.

CONTENT MAY INCLUDE
• Interactive sessions on the recognition of the deteriorating child.
• Skills station including airway, fluid management (intra-osseous use), compressions and defibrillation.
• Discussions regarding human factors and how we interact in a team.
• BLS simulation based on the “First 3 Minutes” on first line management whilst you are waiting for help to arrive.

TARGET AUDIENCE
Suitable for all nursing, medical and allied health care members with a minimum of 2 years’ experience, who are required to take a role in recognising and responding to a deteriorating child.
Professionals completing the Recognising and Responding to the Deteriorating Child Workshop will receive 10 Continuing Professional Development (CPD) hours.

WORKSHOP COST
No charge for nursing staff of The Royal Children’s Hospital.*
*It is the responsibility of the participant to seek manager approval to attend.
