Nephrology

The Royal Children's Hospital Melbourne 50 Flemington Road Parkville Victoria 3052 Australia Telephone +61 3 9345 5054 www.rch.org.au/nephrology

RCH 200300 December 2020

When to call the doctor

Call the Nephrology office or the doctor on call if:

- your child has proteinuria (3+ or 4+ on dipstick) for four consecutive days
- your child has proteinuria (1+-2+ on dipstick) for seven consecutive days
- your child has gained more than 3kg during a relapse
- your child has cold hands and feet, or abdominal pain during a relapse
- your child has fever or vomiting whilst on treatment
- your child has had an exposure to chickenpox whilst on treatment.

Prednisolone course

The first course of prednisolone lasts three months with reductions in medication every few weeks. The change from daily prednisolone therapy to alternate daily therapy is made after the first month. If your child does not enter remission after three to four weeks your doctor may organise other therapy and additional tests.

The treatment of second and subsequent episodes of nephrotic syndrome (relapses) involves two to three months of treatment, with reduction in medication every two weeks. You may also be instructed to give prednisolone to prevent a relapse at the onset of an infection.

Prednisolone is supplied by the chemist on prescription in either 25mg or 5mg tablets or in a suspension (Pred-mix) 5mg/ml.

1st episode

Give	mg daily for	one month
Then	mg every second day for	one month
Then	mg every second day for	one month
Then	mg every second day for	one month
Then	mg every second day for	one month
Then	mg every second day for	one month

2nd episode

Give	mg daily until urine trace/neg protein for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days

Alternative regime

Give	mg daily until urine trace/neg protein for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days

Alternative regime

Give	mg daily until urine trace/neg protein for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days
Then	mg every second day for	days
