Diagnostic audiology centres

Centres listed in Section A (coloured blue) are able to assess infants from birth. VIHSP refers newborns to these centres following a refer result on their screen, or when a direct referral is indicated.

MCHN, SCN and other professionals who need to refer to diagnostic audiology for risk factor follow up can choose centres from Sections A or B. (Please note that some centres have minimum age prerequisites).

SECTION A		Diagnostic Audiology Centres for VIHSP referred infants	
<i>For infants with a refer result on their screen or requiring direct referral</i>			
Centre	Contact Details	Postal Address	Details
